APPLIED FOR 4TH CYCLE

CRITERION 2

Teaching Learning and Evaluation

2.2. Catering to Student Diversity

2.2.1 The institution assesses the learning levels of the students and organises special Programmes for advanced learners and slow learners

Submitted to

THE NATIONAL ASSESSMENT AND ACCREDITATION COUNCIL

Advance Learner and Slow Learner

1.) Advanced Learners

The term advanced learner refers to the students who can engage learning activities faster than the other students in the class and achieve high scores and make significant achievements in their life. They are more potential with their comprehension, retention, memory, critical thinking, creativity and contextualization practices. They also may have hard working behaviors and usually achieve more than the majority of the classmates. These students are in a great extend gifted and talented than the others in the class. These students can take up higher level learning and academic responsibilities. They can bring some new concepts, strategies, and also can take the leadership in the teaching learning activities.

2) Slow Learners

The slow learners are always the poor achievers and lag behind with the academic life. They may fail in exams or will score only poor grades. They will find it difficult to understand the lessons and may have difficulties in their comprehension, retention, reproduction and integration. They *may fail in articulations and critical reflections*. Their motivation levels also may be poor and may find it difficult to adjust with the teaching learning process and can drop out or fail in the programme. The poor performance may not be a sign of the poor capacity or talent but may be due to inappropriate teaching methods, poor family situations, inadequate motivations and supports, unscientific learning practices or even the inability to converse in an unfamiliar language.

Methods of assessment

The students are assessed to identify their learning levels by different mechanisms. The merit in the qualifying examinations, Competitive entrance examinations, and the performance in the initial stage of the programme including the bridge programme and orientations assessed through the qualitative methods can be taken as indicators of their achievement as they get admitted to the programme in the Institution . This level can be set as the benchmark of the student. Subsequently they can be assessed continuously through the examination results at various levels and stages, their performances in the extra - curricular and co - curricular activities throughout the programme. *The assessment procedure can be in three levels like High, Average and Low.* The change of the students and the levels achievements can also be compared with the previous semester so that the advancements can be assessed and appropriate interventions can be made.

Scope for Advanced learners

1. Skill lab is established for Inculcating the habit of studying hard and equip them for facing the competitive examinations.
2. Advanced learners are motivated to strive for higher goals. They are provided with additional inputs for better career planning and growth through offering special coaching for higher level competitive examinations
3. Motivating them to involve in research projects to inculcate research orientation and higher studies aspirations
4. Helping them to participate in group discussions, technical quizzes to develop analytical and problem solving abilities in them and thereby, to improve their presentation skills. Encouraging them to participate in National International Conferences and also to make presentations
5. Stirring the advanced learners to make quality publications and creative contributions to the academic as well as to the practical world
6. They are given special prizes and special facilities like digital library and special scholarships or making their ideas become visible.
7. The mentors give higher goals and also make the advanced learners get higher levels of personality development and stress management trainings.
8. They are made the supporters to the average and the slow learners.

Scope for Slow learners

1. Slow learners are specially advised and Week-end counseling by a teacher guardian and the subject expert.
2. The Department and individual teachers help the slow learners by giving proper guidance and support to them.
3. Organize remedial programmes for them.
4. Conduct extra classes for the difficult subjects (based on the previous university results) in the curriculum.
5. The students are given with training on communication skills, personality development, time management and motivational sessions.
6. Academic and personal counseling are given to the slow learners by the mentor and the counseling cell.
7. Bilingual explanation and discussions are imparted to the slow learners after the class hours for better understanding.
8. Provision of simple and standard lecture notes/course materials and special preparation for the exams will be good.
9. Analyzing the Question Paper.

10. Getting the support of the advanced learners to the slow learners in making their learning process more participatory and interesting.

11. Peer education strategies are effectively used

12. Encouraging the group learning activities and discussion, will be useful to the slow learners.
